From Songs of Killarney. THE ART OF PLAYING SECOND

Te work may se said to be divided into great and sma lore histras only we call them 'circles' or 'classes' o society, each raying its own great harmonies to evolve, but often procueing vi est a iscores instead.

To the philosophical observer, one igreat source of these discord's seems evident in the cons, and attempts at usurpation of the leading parts ry interior per ormers. The sweet voice of treflute rises into a discort and such cueru ous shries. of them as is willing to take the pince of the "second factio." The audity, gracely, y, and gracious y, to may this comparative y humb e part is indeed one of the most rare y attained of social arts; but it is not the less a necessary accuirement, i we would not acc, to the a renev sufficiently neace estroying discores of ife.

there is in us the materia of which this, saoisis" are made we may be sure it will on y ceve on slow y, and that the hope ar voice will proclaim our powers as soon as we have them. Sconer, perhans, or who cannot recall now, As wind on the dry means the profit of soc. during our ate war, one genera a ter another was we comec with acc amations as the coming great man, who yet proved to be able on y to Day secondary parts in the terrible are uce, the wai ing symphonies, and the crashing linale of that are in oratorio. Yet, there were great men among the secondary players, men who but narrow w laked of the mignest, mt who, having Bilei, sac greatness enough to acknowledge the ai ure, and to go on coing their duty, and Laying their parts in a way to excite admiration in

The part dopu arry known as "second dode" offers no specia, attractions to first-class berformers, but requently more real talent can be evinced in grace's y descending to the ower position than in fing the higher, while the narmony o' Society depends more upon the qualityand temper of the mass of its members, than of its leaders; ust as the u, sweet harmonies. produced by the well trained orchestra, cebenc ess upon the powers of one great musician, tian upon the measure o sell with which each comparative y insignifican per ormer plays his

In public life, the person who attempts to usurn a n'ace nigher than be ongs to him, is obnoxious in socia ite, absurc; in comeste e, wicker. Yet it is in the last that we see he eas acquiescence; especially on he par of hose w to are concerned to a. but secondary places in the seams or esteem of their friends. Doubtess it is very nard to give much affection, and tyrantica, the dislova absorb tove and devotion to which hey have unjust claim; me strugg es and reperious will not after the act, though quiet submission may.

The "suman nature" in each of us coes no. fee to ay "second fee,e" to any one under any circumstances, and east of a in the dearts o our Tienes; but it is an art we must an acruire if we would not do more evi. than good in who, in some way and at some time, is hot ca er union to sperifice himself to the good of the par as earnest y, conscien lous i, and loving v, even as if it were he most bri lant to e in the universe; observing strictly and observing the gorden ru e of the courtly of clewish gentleman, whom Christians have named Saint "au": "In ionor prezenting one and per." - Wood's Houseanold Lagarine for February.

THAT 'AR AND MORE OF IT. A VISIT TO ALFRED TENNYSON.

haz was a mesancho'y meeting between mes and the great English poet, in his quiet, unpretenting some on the Isle of Wight. Fifteen years is ore last visited A rec lennyson in company with Charles Diesens. Then we were in the lest of tumor-Dickens' sparking wit have a ways but a weakness or numor, but even i se grave Tennyson, who cous as if it cost

tim a _a bor to smi e. At that time Tennyson was a fine ooking man, with place hair and peare, and his face was hard y furrowed. I hought that I had press y changed in hose fifteen years; but Tennyson sac evicent y grown o cer much faster.

As we shook danks, we looked in each other's eves and his 5 ed with tears. Wity, . con't thow exact /; I suppose it was a tribute paid to. the memory or Char es Dic cens.

indeed, the first works he at ered were "An tais time you come alone, Mr. Ancersen. Do you remember the theatrical perform-

ance at Gaesai. 211 Way saling not? The play was "London Assurance," and the leading part was given by, Charles Dickens.

hat was in 1858, and is the audience were A rec Tennyson, Charles Reade, Goschen, De ane, and others whose names have since be-

come fameus. "What a time we had?" exclaimed Tenny-

Now now long wit a church full of are last at him through the gardens, as he had cone hiteen years or ore.

There was he tablet to the memory of young Fa. am. It oosed somewaat commertian in 1858 out it had been surrounced in the most est letic manner with the linest growth of ivv.

"Two seems to be your favorite plant," I said o Tennyson. "To tell you the truth, it is," he replieds "vy needs no nursing. It anows neither text nor co c. La is the plant of in mortality."

"Bu; what about laure. ?" I rejoined. "Laurel wreat is," he said, playfully, "Sook we hough in pictures; but, in reality, they wither toolsoon."

This was a go cen saying. Tow many writers have i seen wreathed in laurel, and now soon the laure became cry and withered! We returned to Tennyson's intary. Ile shower me the manuscript of his first volume of poems; I opened he first page-"Where

Carioel ow liet's." To me there is in this rulet little noem somein thing to im-tate the clear, commencing Deckir want of meth; why sextant, when we try greve-year is described in a few lines, will thing is cescribad y charming. The sma countit is impossible to compute. such consummate and ity that you actually beieve yourse. to be there; and the wate you seem to hear, as if coming from ar away, bat a "ancient me only," which will be sure to vibrate in your heart when you read "Carbel," pro-viced there is a poetical vein in your bosom.

> Tennyson to me. "When I led the Sound," replied, laugh "Scarcely a month passes without a frightful ing, the was raining, and the Katlegat was as a case of one of osses of life and property through ec. into a ury.

"Te' me about Gear Scandinavia," said

"Now," he rejoined, " lat Cattegar of yours is jorrioly cestructive o's jia mng-craft, bu. take it to be the most interesting sea in Europe. Oic Kanneguy, the man enting giant, was burried in it, right of the shores of ut and. Anttegat, the young hero, overnowered him; but, when he himse cied of a protein heart, on account of hir Signic's fait essness, he swore he would never be at lest until the who eld lutand was burried in the side waters of the sea; and so his spirit storms and raves a most incessant.y, giving the sea painters sub ime subjects,

TREMENDOUS COST OF IGNORANCE.

Président A. D. White, in an address at Ann Arbor, Mich., says: "The material progress of "Yes," I replied, "and do you remember our nation demands that the State make provismorning, so that we might go with you to the higher education. See on every rand the minions of countries squandered by unscientific an rinear of Wight?"

scientific engineers. Lauve seen the traffic of a
Obcourse redic, and he made me was with who eathy stopped for each together sections no body could be found able to construct a screwarch bridge.

"Some years ago I had becausion to visit on public pusiness one of the West Inche is ands. ie nationa s'ilo which carried us out had been new, y turnished with engines and machinery at an expense of nearly \$1,000,000, and yet we were so ong making a five cays' voyage that on ancing we ound our honored contuenes in most of the newspapers. On our return the engines and machinery were concerned as faulty in construction, and were so a for \$50,000 -s oss on that sit y e transaction sufficient to rear a. better ecuipped school for the education of civil

engineers than the world has ever seen! "A few years ago some speculators professed to have discovered a valuable good mine in Cal-Fornia, and commenced selling stock at an assymed value of \$1,000,000. Mr. Carence King, an expert minera ogist, by easy but sure tests, found there was no gold there save what har, been purposely that there, and theirich harvest of the swind ers was at an end. How many millions of do lars he has saved to innocent paries by his expose of the Negaria diamond hour

An eastern capitalist was on the point of investing in an iron mire in northern Surece. A sample of the ore fer into the hands of a prolessor in the scientific school at Yale, who apwied the proper Camica, tests and ounc so large a proportion of litanium in it as to render the ore practice y worth ess. The processor's n': was \$200; amount he saved the capitalist, \$600,000.

insufficient know edge on the part of civil and mining engineers."

MELON CUBTURY.

As the gardening season approaches, the forlowing hints on the Julture of the Watermeion, which we extract from the Danbury lines, may be of interest and value :--

Can the waterme on be success ally dult varea on sancy soi, is a rura town of a,000 indaditants, and an institution located near or containing one nundred and twenty students studying for the ministry?" "his question excited considerable discussion among the agriculturists present at a meeting of the "sayseeds" in Cleveland, and heavy an hour and a half was spent in discussing the same. An old green grocer, who had raised early and late vegetables for the market twenty years of his early life, said he could raise melons on top of a parn, or a billiard table even, let him pick the locality and his neighbors. It was not so much the soil nor season that the melon depended upon for its perfection, as it was the pecu farities of the inhabitants of the country round about. Where there was an excess of co orec citizens, it was a most as impossible to raise a paying crop of melons as it was to acco spring chickens, unless they roosted at aight in a merring's sale. Den again, co eges have a bac effect upon the me on crop, and even a minister's lamily of seven boys has been known to blight a large patch in, a single night. In sections of country where these crawbacks exist, the speaker had learned that the only me hoc to insure a w. crop of melons was to station a man by each me on from the time it was the size of a ten's egg until it ripened. It is was expensive. out the result was always gratifying. As he ru t zrew in size and approached ripeness, se speaker jac found it necessary to station two guards over-each melon, and even then is comnundles where a too great fundness for these uscious products existed, de hac known of the anside of a waterme on being so en and devoured when two men with c ups were seated on the sae. or rine, engaged in Tiene y converse.

Channel. A succen flaw of wine absets the coal left of they can right helf, she file with water, and sinks; and the two men are swimming or their ives. "Ah, we ill says one of them to the oner, "it is a ong the following on their eastern flank, a part of it being taken up by them to the water is warm, and we are strong. We will to character of them on the meritians of west longitude, being bounded on the north butture, and on the south by New Alexico, and on the south by New Alexico, and on the containing about 105,475 square miles, or 67,420,000 agrees with a polony or two one user, with Rew ersey thrown in for good measure." wa riends are in a canoe in the 5 ozambicue

rentmered ter as cled. Good by Good sees you!" and he is gone. There is not ing his companion can co or him. for himse , a he ear do is to swim, and then for and rest names. and weather to swim again, and then oa, and rest again, hour a ter lour, to swim and Post, with steady, ca in determination, that ic w go tome: that no binding spray sha. st fe 4im, and no ces mir wengen nin, - nour a les bour, til at ast the nam-trees show distimes a con the shore, and then the ta reeds, and times a contraction to the state of the stat it lend the figures of anima s. Will one never fee "ha story that man to i me.

Now, what is the eitherence between those two men? Way coes one give un the contest at ate, while the other fights the cheums ances for hours, the wins the latte? On shippoare one numerale. was to strong as the other, e was as brave. e was as stucent as the other. "What if he

was: you say. Strength and pravery and recence were all needed in the crisis; and something else was needed a so- and man had never trained omse to swim. The knew how to swim, if knowing a method were of much use, is sere one has not trained himse to the in it, But that training be had never given.

Vale that as a precise i ustration, where no. xxly crestions the answer, of the difference wrong it in two men mere y by exercise, or the steaches of training. In matters like this, of ourse social exercise, every socy sees and owns its were and as results.

We are beginning in our time to acknow edge the same work and the same results in other victories and in their companion facutes. A counfry own senes two men to the legis ature, -- one secures a understands a about the fowing of the mean ows on their river, which is the great interest of that year; and another - we , because he mag n ace a good speech at the lown-meeting. But ever some unders and s that the first is worth five times as much as the second, and that his coin on is of five force value. Yes, so it is, in a certain sense. But when the great cay fomes, when that meatow his siness is to be explained to the Thuse, our soin freen, acen with acts an is uses, tries to explain it; and he segmis at the weongiene. Le takes for grantee pist what the consecutes not know, and his term term just what there o snow. I e empties the man; and he sits town, with his speed i on y tail spoken, reacy its weed for mortification. It is then that ais fresh, good natured, relacy to league waispers him out into a committee room, takes the manuskist of the outstoken speech, and renes it : I ves in ois a me the four essentia a mags, and makes sare that he is not con used alon, them; goes back into the - ouse; waits it is the light moment; and other, just score the cenate is c oset, speaks for ten manutes on y: An. then, a . this witten was so quil becomes interesting to us a haze that which was so obscure secomes perfect y clear and the whole pusiness of the meaddwg is set right for a century. What is the difference between those two men? You have to conless there, that training, thorough exercise, applies rut on to swimming am lencing and other products. maying be thato, and other matters of muscle Dialying the phano, and other matters of muscle and neares. I applies a so, it seems, to memory and reasoning and magnation. It gives this young sellow confidence and presence of mind in the matter of artesum were, will shortly be made in the matter of artesum were, will shortly be made in the matter of artesum were, will shortly be made in the matter of artesum were, will shortly be made to be provided as a special property of the provided and so the provided and so the matter of artesum were and it has been supported as a special property of the provided and in acc or an unition of audience, just as it gave the owner coancence and perseverance in the owner coancent c

of memory, and imagination, and come into ines of memory, and imagination, and come into ines of ife even more cinicut, if they be more and the state of the Stock is serest of the soundy may be gathered from the following figures taken from the Assession, that 100 per segin to take which y, and is to sork reports for 1871 and 1872. In the former year there inderstant white one of the masters meant when spoke of Enoset who have their acuties spoke of the spoke of t are spoke of Enotes, who have their aculies makes, 6,088 cows. 1,145 oken, 5,536 calves, 50,314 sheep, and 155 swine. In 1872 there were 960 libres, 96 trained; to the knowledge of good and evil.

Granted that swi making must be carned. Yes:

Information for Strangers. COLORADO.

thrown in for good measure."

For many reasons, Colorado is one of the most remarka-ble sections of country or the face of the earth. Though not geographically, it is, really, the centre of the Porth American Continent. Up to im giant peaks, there is a gradua slope on every side, from the Akantic on the mast the Pacific on the west, tae Gulf of Mexico on the south, anothe confines of the Polar Sea on the worth.

The dwellers on its "p ains" or lower lands, live, on the average, about a raile a love the level of the sea; whilst those who live in its "mounthin towns," are lifter still

triggii simaline, which continually characterize it, act like a characterize it, act like a characterize it system, invigorating the bodicy powers and inducing constant "good spirits." The drynes and purity of the anno-phere reneer it especially suitable for action as are of coissimplive or authority suitable for suffer from any affection of the throat or tanges; at Computer a disease has obtained too first a milestant and the literature. once, and resign times to what people ca his certain a regain scalibrand strength. The resources of the country are almost limitless and in-

its mountains are scamed and streaked with previous wealth of all kinds—gold and silvier, copper indiend, coal

Cradled in their brawny arms and tying at their out-Craded in their brawny arms and lying at their out-spread fact, are pea selfil valleys, wherein the farmer raises crops of rich abundance. Owing to the small rainfall, irri-gation is necessary to the cultivation of the soil: but this, when understoot, is comparatively little labor, and far-mer than compensated for by the great yield which is ob-ained.

. 1 Eastward from the mountains, the "great p ains" strete ; in almost houselless extent, covered with rich grasses, which refider them the best passives in the work. Sider and cattle there appear them with but little care, and with few exceptions through the winter as well as the summer. Juring the fat, the different of the amosphere cures the manual and their marketons can like any causes, scaling up it them all their nutricious qua ities and leaving them stand ng up in the ground as natural may make stock of feed, needing no preparation and no

The Foot-Hills are emored with timber, and gon ain the consequence convent with times, and am am almost electry viriety of building stone. Some of the rivers afford water power of the finest character. In short, Colorado offers all the natural resources necessary for a Contract of the three great productive indistries.

Mining: Agriculture, and A annuarines—and all the attractions of Scenery and Climate calculated to make it a healthful and deligniful home.

EL PASO COUNTY.

El Paso County is one of the central counties of the Ter-ritory and embrace ca fair share of its principal physical characteristics—mornatain, walley, and flain. Along its northern border stretches the Great Colorado. Tivide. nne-covered moustain spur, which takes its name from the fact that it separates the sections of country tributary to the chief rivers of the Territory, the Platte in the north and the Ar ansas in the south. From the "Divk e" territory county has a continual slope southward, its southern before are being eighteen miles north of the Arkansus, the distance from north to south being about forty two miles. This condistant slope-expanses the whole of the country, the late a gorden wat, to the full kinnight shape a marked t upon its chmatic characteristics. The distance from effect upon its chimatic characteristics. The distance from the eastern boundary of the county to the foot of the mountains, is about very miles, and beyond that, the county embraces about thirty index of mountainous country, making the total width a out seventy miles. The area includes about 1/35, 220 acres, of waich upwards of 94,-

hough Fike's Peck—the great focki point of the go dexcitement which first brought Colorado into notice—is smarted to the county, there are few, i any, known valuable deposits of the precious metals; hence, El Poso countries have been accountable to the precious metals; hence, El Poso countries have been experienced. the stepos to of the precious, 'metals,' nence, for ruso country has no date amongst the mining countries of the Terretory. It has however, the advantage of a market in the maring districts to the west, which are leeached by the Use.

Down These mining districts to a state of the terretory of t Pass. These mining districts are modly growing into great importance, being at roget the richest in the try, and will course a large cemand for agricultural another are large.

justment of the orain, or whether it does same lines of the process of the spirit, what ever the field ty of reasoning is, and whateverithe field ty of the imagination is, you fine the any including water upon the harding water upon the best taken up, and ramp are remewed, that those who have seen exercised for the use of their activities are in the very training the suberior of those who have let such the third to stry which has been regarded to when a little trouble is taken to his or most valuable character.

The Lumber Trade is an important part of the business

COLORADO SPRINGS

The lown tikes its name from masses valuablen mes-The four tikes its name from immercus vanishien iner-al springs in his immediate in 2 aborholic. The most im-portant of these are grouped eigether about five miles so the wort, in a beautiful gion, to which has been given the name of Monton. These are the celebrated Bolling Springs," which, years, ago, were made known to the world by Frenont, Ruxton; and other writers. Formerly they word visites on account o't reir medicinal virtues by the name trees of Indians, who regarded them as supernaturall phen mena caused by the direct action of the Great Sarri. In latter times, rotwithstanding the difficulty of in cless to them, their fame an attracted large numbers of invalies, anxious to ava translers of tre healing but practiced. Mail, and experience in saying 1.

And these sample it ustration, are enough to show although all short signific is the con, of hand statement which says that, occause we all now the fight, we shall, occause we all the fight, we shall, occause we all the fight, we shall, occause we all many other conveniences provided. Now that these famous springs are so easily accessible, and that every provision has seen made for the comfort of visitors, there can be no done that a few years will suffice to make them although the provision has seen made for the comfort of visitors, there can be no done that a few years will suffice to make them although to the every year, and many will take up permanent abodes around them. It is springs are seven muster, and are useful both for drinking and bathing his seri image. Innits. But it certain y passes.

In addition to these wonderfus springs, some of the most remarkable and magnificent ace very on the American Continent is in progimity to the town,

Directly in front is Pike's Peak the most celebrated of Directly in front is Pike's Peak the most celebrated of the Rocky Mountains, rising to a height of inwards of 14,000 feet above sea level, its head covered with snow all the year. Right and left of the Peak is a long range of "Foot-Hills" lofty mountains they would be termed in any other land, "infinitely diversified wire arrively of form and outline, with rocky crags and tumbled boulders and smooth slopes, with constant play of light and shade, with contrast of rich and sombre colors, with streaks of snow and dark groves of pine"—the whole forming a panorama of exceeding beauty, of which the eye never sizes.

exceeding seasy; or which the eye never uses.

Thee miles from town is the wonderful and famous "Garden of the Grids," in which tage rocks, hundreds of ect high, and or the most fantastic shapes, are gorzeous colors, form a scene witch, excites the wonder of all who behold it. Close to the Garden is "Glen Zyrie," with its Queen's Canon, equally woncerful and heautiful. The miles to the southwest of the town is "Cheyenne Canon," a machinism coerse, whose sumen may walk of rock and mi es to the sout iwest of the town is "Cheyenne Canon," a magnificant gorge, whose stupencous wa is of rock and beautifu waterfal's give it an a most urrivalet grandeur. "welve miles rooth is "Konument Park," studied with groups of only columns of sandstone, which ook itse obelisks of some of contains of sandstone, which ook is else of sands when the Canon and Fals of the Tountain, and the He has no of beauty. "The act vantage of this point," says a recent writer, "is that it lets you at once into the heart of the mountains."

The Springs and the Scenery combined are custines, of The Springs and the Scenery combined are destined, of themselves, to all course town of considerable size and importance. Here will be a place, of resort—of a more uncount thousands of visitors, from amost every State in the Inion, and from foreign lands, and each succeeding season will bring an increasing throng; whils many, who are in search to the trial have already under its their permanent nome; and many more will settle here in order to secure the same manually hoose.

Everythese recommend is assisted town and between the same inextinate town.

Everything post to its owing code to helisten the attractive trianacter of sout on which Nature are bestowed so many advantages. It is intent at, to make Colorado Springs not only amous as a Sanitatium, and ano as as sourcement centre, and a value of toffice society. Large reservations have been made for second and timered final justions, and the country, allowed at the country materialism abe encounted of a country school-name.

Ample limbs wi accommate to many onthe worke learning the town, of erecting purify his days, and of constructing necessary public works. The town is a Colony lown, and the whole of the profus derived from the sale of the Colony Loss and many, are appropriated to white improvements. He hand having been longith in arge targets at low raise, and being so the colonies in amilitarial advanced figures, many thousands of collars will thus be derived to the purpose named.

Porsons may become colonies by purchasing derifficates of membership, which are of four y as es, according to the militarial entire colonies are of targe denominations: "Business Lots," as feet by the feet, ranging in prices from; too to 1250; "Residence into a price from 150 to 1250; "Residence in prices from 150 to 1250; "Onlying Tracts," of the following sizes and prices: One-acre tracts, at 50; five-acre tracts, 136; the twenty-acre tracts, 136; to 1340 an acre; tracts, 136; the same tracts are fracts, 136; the same tracts, 136; the same tracts are fracts, 136; the same tract s50 residence lot; a \$75 certificate, any residence or irrespective of price; a \$150 certificate, to ocate a misiness an residence lot, or a misiness of anc outlying trace, or a residence lot, and outlying trace, provided the total value of the ands ocated does not excee. \$500; a same certificate, to ocate similar lots as the previous; but irrespective of price. I' he amount paid for the certificate is credited for the lots ocate, and rip be ance (if the value of the lots ocate, and the previous has be paid any time within twelve maints of the location for of the first location, if more than one is made u on the same set ifficate). Members may take out as many certificates as they prease, but are bound to make one improvement (was is to put u) Members may take out as many certificates as they please. Out are bount to make one improvement (uset is to put u) a house, or make some equivalent expenditure, for eact certificate, within four months of making the first location upon it. Upon this being done, and payment of the ots complete, deeds are given conveying full title; with one concition, towever—that no intoxicating lictuous is tall ever be sold on such lors in any premises having the character of a place of bub is resort; breach of this four-tition

acter of a place of sub-ir resort; breach of this coactition; involves forfesture of the property.

The lanca about the "cwn, of which the Colony possess. And tands about the cwn, of which the Colony possess about 10,000 acres, are excellently adapted for the tivation. A great portion is almost as flat as a stable, with an exceeding y slight slope; so that it can be irrigated with the utmost facility. Irrigating canals have been constructed, and arge resortwors for the purpose of storing water as an insurance against exceptionally thry seasons. The locality arge reservoirs for the purpose of storing water as an in-surance against exceptionally dry seasons. The locality and the soil are especially suitable for the cultivation of smalfruits, and for these a ready market will be sound, in addition to the supply required by the Town, and sy the mines not far away, a company has been former for the purpose of exact is ling a Canning factory in the Town so soon as the quantity of fruit grown shall exceed the
